I'm a UI/UX Designer with 4+ years of experience and a Masters degree in Human Computer Interaction.

I like solving design problems and creating delightful user experiences through research, quantitative data and my intuition as a designer. I leverage research to design user-centered products and experiences that solve both user & business problems.

WORK

UI/UX Designer, Apple, California
August 2018 - Present

Contributing to UI/UX of apple's internal product teams.

Projects include designing complex dashboards and creating end-to-end workflows for responsive web and iOS apps.

Collaborated on creating an internal design system

UI/UX Design Intern, Monigle
May 2018 - August 2018

Contributed to the UX & UI of design systems of large enterprise clients like Bank of America, Chase, Deloitte etc.

Created atomic design systems for clients.

Worked closely in support of internal development and client experience teams.

Product Designer, Pobyt, Remote
June 2017 - May 2018

Solely responsible for product strategy and end-to-end design of Pobyt's mobile experience.
